INTRODUCTION

Bring Out The Best Of Your Smile!

A shy smile hides your true self from the world. Problems with your teeth, gums and jaw create a barrier between you and your friends and family. If you're self-conscious about discoloured, mishappen or crooked teeth you may find yourself reigning in your smile or hiding it behind your hand. A smile makeover starts with a treatment plan tailored to your personal goals.

You tell us what areas you'd like to improve and we'll show you what treatment options and procedures are available. Feel confident you're in safe hands. We know how important it is for your treatment to be as quick and painless as possible-- we care about your overall health. That's why we have invested in the latest dental technology to ensure a swift diagnosis and a quick and accurate treatment which will have you back on your feet in no time.

Dr. Ameen Al-Obaidi

SINUS AUGMENTATION

Growing Your Bone With Sinus Augmentation

A simple procedure repositions the sinus floor, creating space to properly place an implant.

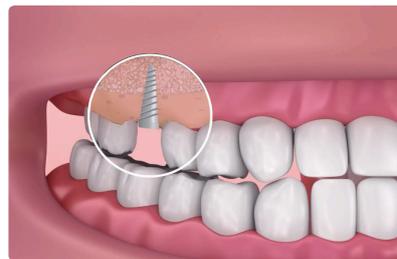

Loss of posterior teeth results in excessive forces being placed on your anterior teeth. Fortunately, the use of dental implants and crowns allows you to replace your missing teeth. However, the position of the sinus in upper posterior areas may be too low for proper placement of dental implants.

Graft materials are used to encourage your bone to grow more quickly into the area, helping to stabilize your dental implant. These grafting materials are replaced by your own bone as it grows into the area.

If your implants are placed at the time of sinus augmentation, they can be restored by your dentist 5 to 6 months later. Sometimes the implants are placed 5-6 months after the sinus augmentation, when your bone has grown.

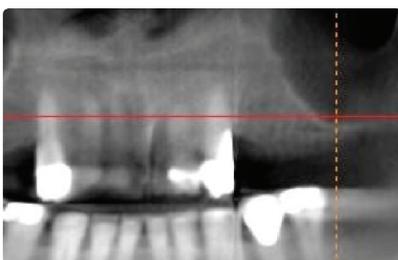

Insufficient bone is present below the sinus for implant placement.

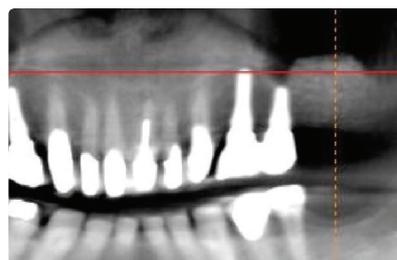

Once the graft has completely healed, you can safely receive implants.

Following sinus augmentation, implant placement and restoration, you regain your lost function and improve your chewing and comfort.

A patient presents without enough bone for implant placement in the upper left molar area.

Six months after sinus augmentation has been performed, more than adequate bone is present for implant placement in the upper molar area. An implant will also be placed in the lower molar area. The result will be greatly improved function for the patient.

SINUS AUGMENTATION

Commonly Asked Questions

Will the sinus augmentation procedure hurt?

Only *Lidocaine* is necessary to perform a sinus augmentation procedure. During the visit you will feel nothing once the area has been numbed. When the *Lidocaine* wears off, there may be mild discomfort. This procedure will not cause you to miss work.

How long does a sinus augmentation procedure take?

The visit to perform a sinus augmentation procedure is approximately 1 hour.

What is the cost of sinus augmentation?

The cost of the sinus augmentation will vary with the situation. Your periodontist will discuss with you before proceeding with treatment.

How well will the sinus augmentation work?

Sinus augmentation procedures are highly predictable, with studies reporting over 95% success.

How long do I have to wait after sinus augmentation to have my implants placed?

Depending upon your individual situation, the implants may be placed at the time the sinus augmentation procedure is performed. If the implants are not placed at that time, you will wait 5-6 months after your sinus augmentation procedure to place the implants.

TESTIMONIALS

What Our Patients Have To Say

“Dr.Ameen makes the dental experience very relaxing and comfortable. I had my wisdom teeth removed and I was extremely nervous, but as always, Dr.Ameen was able to get me relaxed and prepared. When the procedure was done, I was given instructions on how to heal properly and left self-assured about the whole procedure. A gentle, kind, and relaxed dentist is hard to find, but our family found one.”

EDWARD

“

I have been going to Redwood Dental for a long time and have been treated very well and taken in quickly when I have a problem. The staff and doctors are always prepared. They helped me sort out my benefits as well.

DUNCAN

“

Had a great experience with the dental office! Great front desk staff and great dentist. I felt no pain or discomfort. I actually could have fallen asleep in the chair. They always checked to see if I was alright and made me feel welcome.

CAITLIN

“

Amazing staff, and the dentists there are helpful and listen to what you have to say. I work different hours so it's great when they can squeeze me in last minute. One of the friendliest dental offices I have been to.

RICHY

MEET YOUR DENTIST

Dr. Ameen

Dr. Ameen graduated from Baghdad University in 1997 with a Bachelor degree in Dental Surgery. He finished a post graduate diploma in dental surgery MFDS from Glasgow in 2010. He was interested in implant surgery and cosmetic dentistry, therefore, he finished his fellowship and continued his clinical and theoretical research, finishing his diploma, in placing and restoring implants. In a nutshell, this prestigious diploma means that he has completed a ton of implants with a very high success rate, and has put in countless hours of continuing education to perfect his craft. Dr. Ameen is happy to be a part of his patient's esthetic journey by helping them restore smiles. He finished his DDS in Canada after passing the NDEB exam in Western Ontario.

Dr. Ameen has had a privilege of working in four continents, which has enabled him to connect and develop great communication skills with patients from all walks of life. He is the owner of four practices; Hamilton (Barton Dental Centre), Mississauga (Tomken Centre Dentistry), Thunder Bay (Redwood Dental Centre), and now recently Thunder Bay (Sky Dental Centre).
